

INTRODUCING FORMPAK

Formpak software has supported formulation and ingredient industries for over 30 years.

Formpak software includes tools to:

- Develop products
- Manage projects and send samples
- Categorise, retrieve and report products
- Manage all your regulatory affairs in one place
- Author, manage and automatically re-issue Safety Data Sheets, labels and other technical documents

FORMPAK SUPPORT

Formpak offers industry leading support and expertise. Our UK based support team help customers directly and provide resources so help is available 24/7:

Formpak Support Desk – available online with over 120 articles including useful overviews, tutorials and in depth regulatory Q&A.
<https://formpaksupport.desk.com/>

Application Help Centre – available directly in the software with information on each application function

YouTube – www.youtube.com/FormpakSoftware

Training Matrix – A catalogue of training content with a guide for new users in different sectors

FORMPAK PRODUCTS

There are three editions of Formpak software to suit all budgets and sizes of business.

 ENTERPRISE EDITION	 GROUP EDITION	 PERSONAL EDITION
Essential for larger groups of users where communication and integration with other systems is required, for example to link with a production management system.	Aimed at small development and technical groups where communication and integration with other systems is not required.	Ideal for independent formulators, consultants and small businesses. This edition is for a single user on one computer.

Each edition of Formpak includes helpful tools for product development, regulatory management and useful documents such as GHS Safety Data Sheets and Labels and region variants for OSHA and CLP.

FORMULATION DEVELOPMENT

Streamlining product development is core to Formpak. Rapid ingredient selection and access to excellent regulatory tools improve speed and compliance during development. State of the art tools for formulation change management and user permissions gives robust control and traceability.

PROJECT MANAGEMENT

Our flexible project system allows you to customise and build your own project templates including tasks, work flow and status, so that the whole team can work together efficiently. Formpak includes tools to manage and analyse current and past projects.

FLEXIBLE PRODUCT & LIBRARY MANAGEMENT

Formpak has a range of tools for classifying and retrieving ingredients and formulations. Searches include name, price, sensory attributes and regulatory compliance – so you can ensure the most appropriate products reach your customer.

EFFICIENT TOOLS FOR REGULATORY AFFAIRS

Formpak includes powerful tools to manage and calculate regulatory and technical information such as GHS, CLP and OSHA, allergens, nutrition, IFRA, country status and limits. Regulatory compliance can be determined in moments using Suitability Checking. This ensures conformance to client, regional and company restrictions even taking into account application, dosage and final product labelling.

CUSTOMISABLE DOCUMENT AUTHORIZING & MANAGEMENT

Formpak enables complete and transparent management of the supply of regulatory and technical documents. You can generate Safety Data Sheets, labels and other regulatory documents; automatically revise them and update previous recipients.

Document choices include industry relevant options such as Allergen Declarations, IFRA Certificates and Technical Data Sheets.

Documents can be produced in over 25 different languages.
