

Print the Composition of an Item

Print the Composition of an Item is a tool used to generate an Item Composition Report. This is a useful report to see different views of a composition.

The screenshot shows a software window titled 'Print the Composition of an Item'. The window has a menu bar with 'Print', 'Cancel', and 'Help' options. Below the title bar, there is a text area that says 'On this page you can print the composition of an item.' Below this is a form with the following fields:

Item	<input type="text"/>
Explosion Type	Physical Explosion
Explosion Depth	One Level
Layout	Without Costs
Quantity	<input type="text"/>
Format	PDF

To generate an Item Composition Report, follow the below process:

- Enter the item of interest
- Select an Explosion Type – This has two options:
 - **Physical Explosion** – This will show the directly added (physical) ingredients.
 - **Regulatory Explosion** – This will show the regulatory components (i.e. the components of raw materials)
- Select an Explosion Depth – This has several options:
 - **One Level** – The standard view of the composition.
 - **Structure** – The composition with levels showing the components of other compositions.
 - **Productionise** - The composition flattened to a practical level, taking into account the Minimum Weighable Quantity (an application setting) and the value of Prevent Explosion for formulations.
 - **Simplify**: Simplify (explode) the composition. This differs to Flatten option by taking into account 'Prevent Explosion' if indicated on any formulations.
 - **Flatten** - The entire composition (flattened)
 - **Manufacturing Instructions** - The composition shown in stage order with manufacturing instructions based on each stage.
- Select a Layout - This has two options:
 - **Without Costs** – This does not include cost information
 - **With Costs** – This will include the Unit and Extended Cost of each component and the Unit and Total Cost of the focus item.
- Specify a quantity – The Quantity entered refers to the total quantity, and this will adjust the quantity of each component accordingly.
- Choose a Format: This gives you the option to choose the file format for the report. PDF, HTML, Excel or CSV options are available.
- Click 'Print' to generate the report

Example 1:

A Physical Explosion at One Level, without costs

Print the Composition of an Item Print | Cancel | Help

On this page you can print the composition of an item.

Print the Composition of an Item

Item: F000083 Rose Geranium formulation

Explosion Type: Physical Explosion

Explosion Depth: One Level

Layout: Without Costs

Quantity: 100

Format: PDF

Item Composition Report Page 1 (1)
Date 29/05/2020

Item Code	F000083	Item Name	Rose Geranium formulation
Explosion Type	Physical Composition	Explosion Depth	One Level
Components Count	11	Quantity	100

Seq	Code	Name	Concentration	Quantity
1	RM0007	Citral	3.0000	3.0000
2	RM0008	Geranium oil	5.0000	5.0000
3	RM0050	Citronellol	14.0000	14.0000
4	RM0051	Geraniol	16.0000	16.0000
5	RM0053	Dipropylene glycol	6.5000	6.5000
6	RM0062	Eugenol	1.0000	1.0000
7	RM0067	Phenethyl Alcohol	50.0000	50.0000
8	RM0069	cis-3-Hexen-1-yl-acetate	0.3000	0.3000
9	RM0070	cis-3-Hexenol	0.2000	0.2000
10	RM0074	Geranyl Acetate	2.0000	2.0000
11	RM0075	Coumarin	2.0000	2.0000

Example 2:

This is the same item report but with the Explosion Depth set to 'Structure':

Print the Composition of an Item Print | Cancel | Help

On this page you can print the composition of an item.

Print the Composition of an Item

Item: F000083 Rose Geranium formulation

Explosion Type: Regulatory Explosion

Explosion Depth: Structure

Layout: Without Costs

Quantity: 100

Format: PDF

Item Composition Report

2	1	COMP0056	Geranyl acetate	2.0000	2.0000
1	11	RM0075	Coumarin	2.0000	2.0000
2	1	COMP0009	Coumarin	2.0000	2.0000

Mini Tip

When viewing a composition in the CDT, there are also options to Simplify (Explode) and Flatten (Explode Everything) in the other menu's drop down list:

Explode is used on individual components, this will take into account 'Prevent Explosion' if indicated on any formulations. It will prompt if this setting has been selected.

Simplify will explode all components, taking into account if the 'Prevent Explosion' option had been selected. – Note: Simplify will only be available in the Other Menu's list when a formulation is present in the composition.

Explode Everything overrides 'Prevent Explosion' and will explode all components to the physical raw materials.

All of our training and support material can be accessed from our **Support Centre**. The Support Centre is available 24/7 and is a great resource to use at your convenience. It includes:

- Over 100 training and support articles
- Links to training videos
- Quick Start Guides
- The Formpak Training Matrix

The Support Centre can be accessed on the Home screen of Formpak software or via the following link:
https://www.formpak-software.com/Support_Centre/Pages/Support_Centre.html

Our **Support Team** are available:

Monday - Thursday: 8:30 - 17:00 (GMT)

Friday: 8:30 - 16:00(GMT)

Email: support@formpak-software.com

Telephone: +44 (0) 1235 250 020

The Formpak **Help Centre** is included directly in Formpak software, just press the 'Help' button to access it. The Formpak Help Centre offers explanations for each function of the application as well as a glossary of the technical terminology used.
