

'Where Used Report' formerly 'Print Implosion' - Additional search capability

Where Used Report replaces the 'Print Implosion' option, from software version 36244. This has additional search facilities of:

1. Ability to search for multiple items in a single where used search. Criteria for each item can be AND or OR.
2. Ability to search based on Item Class
3. Ability to search within a range of item codes

Where Used Report allows you to view where an item or items are used.

Select to Print the report in desired format - .PDF, .HTML, Excel or .CSV.

The screenshot shows a software window titled 'Print Where Used Report' with a menu bar containing 'Reset', 'Print', 'Cancel', and 'Help'. Below the title bar, there is a blue header area with the text 'On this page you can print a where used report for multiple items.' The main content area is divided into several sections, each with a blue header and a collapse/expand arrow on the right. The 'Items' section has a dropdown for 'Items' set to 'OR' and a search field with a magnifying glass icon. The 'Implosion' section has dropdowns for 'Implosion Type' (Physical Implosion) and 'Implosion Depth' (One Level). The 'Compositions' section has dropdowns for 'Item Class' (Formulation and Raw Material), a search field, and a 'Company Sold To' dropdown. The 'Format' section has a dropdown for 'Format' set to 'PDF'. There is also a 'Sold Since' field with a calendar icon and a date format example 'E.g. d/m/yyyy'.

Mini Tip

There are several options how to open a new tab in Formpak using Internet Explorer, Chrome or Firefox browsers.

1. Right click your link and 'Open Link in New Tab'
2. Hover over the link and click the wheel on your mouse
3. Drag the link to the + on the browser's Tab bar.
